He describes his earliest days in intimate detail, recalling precise camera angles in the room where he was placed as an infant. It seems that, even at the age of 2 weeks, he was preparing a screenplay of the event. He talks about his morning meetings at Clifton's Cafeteria with the giants of Science Fiction from whom he learned his craft. And at the age of 31, he gets his first Hollywood break when Director John Huston hires him as screenwriter on the film *MOBY DICK* (1956). Found in Time– SF&F Feature – USA

Director: Arthur Vincie

Running Time: 89:00m

Website: www.foundintimefilm.com

Found In Time is a fantasy that combines elements of *film noir*, sci-fi, and drama. It takes place in an “altered” present-day New York City. Psychics with real powers sell their “wares” on the street, marginalized by society and closely monitored by the dreaded Psychological Police Corp (the “Psychcops”). They lead dark, lonely lives, plagued as much as helped by their gifts.

Our hero, Chris, is a psychic “collector.” He compulsively picks up the things most of us throw away or forget — pens, coins, lighters, keys, stones, and other detritus — and sells them to passersby. But every object he picks today will have meaning for someone in the future.

His gift comes with a big downside, however — he experiences his life out of order, “slipping” between the past, present and future. Chris tries to live a “regular” existence, and struggles to get his “slippage” under control.

But when he commits murder in the future, he realizes he has to alter his present in order to prevent it. But how can he do this when he’s not even sure of *what time it is*?

The Golden Age of Science Fiction – SF&F Documentary – USA

Director: Eric Solstein

Running Time: 1h:30m

Since my long-ago days, an incipient film artist on the staff of Millennium, I’ve been unable to make conventional films. “The Golden Age of Science Fiction, The Story of John W. Campbell, Jr.” is an documentary that rejects storytelling in favor of conversation, what are disdainfully called “talking heads.” A life is understood through the direct impressions of the subject’s peers, some of the greatest writers of the 20th century. Campbell was an editor whose Astounding Science Fiction magazine is still the foundational document for our culture’s view of what the future is. Because a man is no more fixed or definable than the future itself, this documentary rejects a fixed viewpoint. The film also contains within itself another documentary, the only surviving recording of the editor at work, “Lunch with John Campbell,” by James Gunn.
